

celmac

TOILET SEAT COLLECTION

Celmac is a leading brand of CME Sanitary Systems Limited, recognised throughout the world. The unique range of products within the Celmac Toilet Seat Collection is made possible by the combined manufacturing capabilities of specialist sites in England and the Far East.

Product development

Our highest priority is the innovation and development of new and existing products with a continued dedication to the highest standards of quality and customer service. Our smooth close technology and hinge expertise is second to none. A Research and Development team supports the launch of an ever-increasing number of new products to the industry with many products independently certified to British, European and International standards. We are also involved in the prototype testing of new materials and are constantly benchmarking products from our global sourcing network.

Bespoke products

Alongside our standard product portfolio we have the capability and capacity to create and test bespoke individual products to suit any style of WC pan. If you are interested in this service please contact your sales manager to discuss minimum order quantities. We are keen to work with you to find the solution to your product needs

Order information

COLOURS: Please note that when ordering any colour other than white you will need to replace the WH at the end of the Product Code with the correct colour identifier which is shown on page13.

ALTERNATIVE HINGES: When ordering an alternative hinge pack please note that you will receive the alternative as well as the standard hinge pack.

Spares

A wide range of Hinges and Buffers are readily available, for further information please see our website or call:

SPARES HOTLINE: ☎ 01302 792115

Minimum order requirement

PLEASE NOTE: that there is a minimum order value of £150 - if this is not met there will be a carriage charge applied. The Delivery Lead Times for all major stock items is FIVE working days. To aid efficiency and processing of your order please only quote the product code.

Please note that all dimensions are nominal and are for the seat, not the cover.

POLYGIENE ANTI VIRAL SEATS 

Polygiene is a modified thermoset material which incorporates proven enhanced anti bacterial and anti viral properties. Manufacturers of this material have run extensive independent tests which verify that Polygiene is effective against a wide range of pathogens including MRSA, HIV, SARS and E-Coli.

SMOOTH CLOSE

Manufactured using gel filled dampers, which allows the seat and cover to close smoothly and silently without slamming. All the systems are equipped with a bypass system, which will stop any damage or breakage occurring should the seat or cover be forced shut against the smooth closing action.

THERMOPLASTIC SEATS

Thermoplastic is a generic term for a plastic which does not chemically alter during the moulding process. The major benefit of this being that the material can be melted down and re-utilised at any stage. Our thermoplastic toilet seats are manufactured from polypropylene which is tough and resistant to chemical attack. Whilst thermoplastic provides a good cost effective alternative to thermoset it does not have the same degree of rigidity and scratch resistance.

FREEDOM SEATS

Designed to meet the needs of the elderly, hospitalised or infirm. With extra care taken over the ergonomic designs which ensure improved rigidity and most importantly comfort for the user. These seats are suitable for Doc M application and specification and many have the additional benefit of manufactured in Polygiene anti-viral material.

COMPOSITE SEATS

A range of toilet seats made from Moulded wood, medium density fibre board.

REALWOOD SEATS

A range of toilet seats manufactured from real wood.

THERMOSET SEATS

Thermoset is a generic term for plastics which chemically alter during the moulding process; most importantly they remain stable and in a fixed state once moulded.

Our Thermoset toilet seats are manufactured from Urea Formaldehyde, which is very dense, strong, durable and hardwearing. Urea Formaldehyde also has the additional benefit of containing natural hygienic properties which can be further enhanced by using anti-viral additives.

COMMERCIAL THERMOSET SEATS

Our wide range of thermoset commercial seats are suitable for replacement, local authority, schools, and Doc M where applicable. With BS Standard approval for Sonata and anti bacterial options, this range should meet all of your specification needs.

TOILET SEAT COLOURS

A wide range of colours available, see our colour chart.

The Celmac toilet seats and covers shown below have been fully impregnated with Polygiene™. This is particularly important for use in hospitals, care homes, public buildings, fast food restaurants, hotel chains, airports, mass-transit facilities and other public areas as well as in domestic homes. Polygiene™ contains pathogen killing properties which are proven to be effective in the control of SARS-coronavirus (SARS-CoV). Why take the risk - use Polygiene™.
